Career Objective

I am a Master's student in Economics (Data Analytics) with a strong foundation in Python, PowerBI, Excel, R, SQL and an advanced knowledge of Data Analysis, Economic Modelling, Econometrics and building dashboards, aspiring to build a career in data analytics.

Over four years, academic projects and internships have strengthened my analytical, problem-solving, and collaborative skills. I aim to apply these skills to solve business problems and build data-driven solutions..

Education

M.Sc. Economics (Data Analytics)

expected 2027

Symbiosis School of Economics

Symbiosis International University, Pune CGPA: 8.09

BSc. Economics and Analytics

2025

Christ University, Pune Lavasa

Concentration in Data Analytics & Economics; graduated with 3.8 G.P.A.

Certifications

- Data Collection and Processing with Python - University of Michigan (Coursera)
- Social Media Data Analytics - University of Washington (Coursera)
- Applied Text Mining in Python - University of Michigan (Coursera)
- Generative AI with Large Language Models - DeepLearning.AI (Coursera)

Internships

Eicher Tractors, Mandideep (MP) - On Site

January 6 to April 26 2025

- Finance Intern: Processed employee reimbursements using Excel and SAP, conducted travel expense, dealer mapping analyses, and developed a Market Analysis Report and Power BI dashboard for senior management.

360 Analytika, Siliguri (WB) - Remote
